1. Safety Precautions

1-1. Repair Precaution

- Repair in Shield Box, during detailed tuning.
Take specially care of tuning or test,
because specipicty of cellular phone is sensitive for surrounding interference(RF noise).
- Be careful to use a kind of magnetic object or tool,
because performance of parts is damaged by the influence of magnetic force.
- Surely use a standard screwdriver when you disassemble this product,
otherwise screw will be worn away.
- Use a thicken twisted wire when you measure level.
A thicken twisted wire has low resistance, therefore error of measurement is few.
- Repair after separate Test Pack and Set because for short danger (for example an
overcurrent and furious flames of parts etc) when you repair board in condition of
connecting Test Pack and tuning on.
- Take specially care of soldering, because Land of PCB is small and weak in heat.
- Surely tune on/off while using AC power plug, because a repair of battery charger is
dangerous when tuning ON/OFF PBA and Connector after disassembling charger.
- Don't use as you pleases after change other material than replacement registered on SEC System.
Otherwise engineer in charge isn't charged with problem that you don't keep this rules.

1-2. ESD(Electrostatically Sensitive Devices) Precaution

Several semiconductor may be damaged easily by static electricity. Such parts are called by ESD (Electrostatically Sensitive Devices), for example IC,BGA chip etc. Read Precaution below.

You can prevent from ESD damage by static electricity.

- Remove static electricity remained your body before you touch semiconductor or parts with semiconductor. There are ways that you touch an earthed place or wear static electricity prevention string on wrist.
- Use earthed soldering steel when you connect or disconnect ESD.
- Use soldering removing tool to break static electricity. , otherwise ESD will be damaged by static electricity.
- Don't unpack until you set up ESD on product. Because most of ESD are packed by box and aluminum plate to have conductive power,they are prevented from static electricity.
- You must maintain electric contact between ESD and place due to be set up until ESD is connected completely to the proper place or a circuit board.

2. Specification

2-1. GSM General Specification

	GSM850	GSM900 Phase 1	EGSM 900 Phase 2	DCS1800 Phase 1	PCS1900
Freq. Band[MHz] Uplink/Downlink	824~849 869~864	890~915 935~960	880~915 925~960	1710~1785 1805~1880	1850~1910 1930~1990
ARFCN range	128~251	1~124	0~124 & 975~1023	512~885	512~810
Tx/Rx spacing	45MHz	45MHz	45MHz	95MHz	80MHz

				15	0±5 dBm	15	0±5 dBm

3. Product Function

Main Function

- 3M Camera and camcorder
- Auto Focus
- Quad band support
- Image editor
- MP3 player
- Phonebook
- Name card
- Multimedia Message Service (MMS)
- E-mail
- Voice recorder
- Bluetooth 2.0
- Get personal with photo caller ID
- Web browser
- Java
- Calendar
- TV-out
- Video Message
- Music player(Airplane Mode, Background playing)

4. Array course control

Test Jig (GH80-03306A)

Test Cable (GH39-00499A)

RF Test Cable (GH39-00397A)

Software Downloading

4-1. Downloading Binary, Tfs Files

- Three binary files for downloading D900.
 - D900XAFG6.bin : Modem binary for communication function
& binary for user interface and various application
 - D900XAFG6.tfs: Files need for each application

4-2. Pre-requisite for Downloading

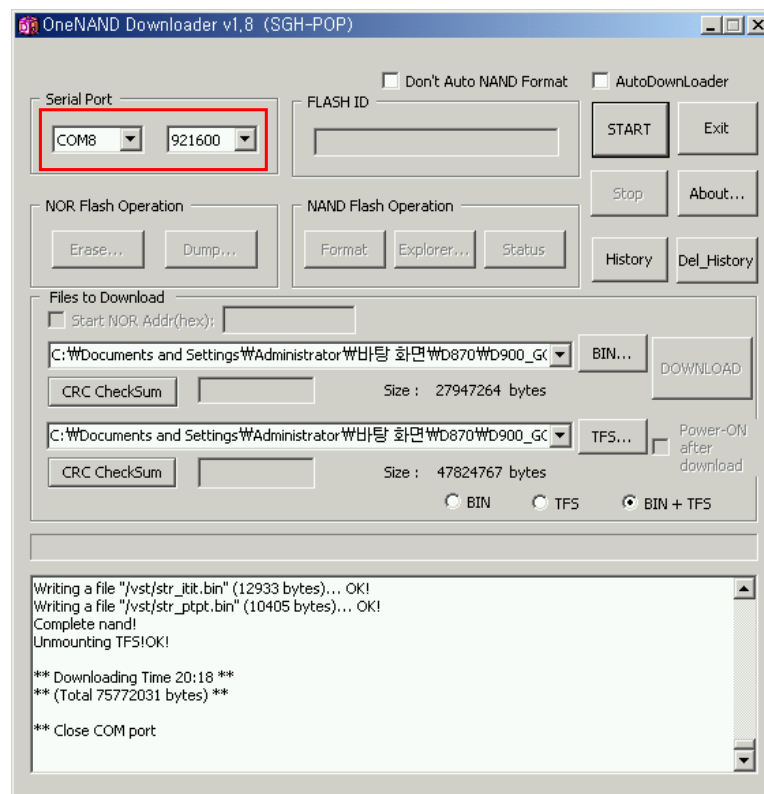

- Downloader Program([OneNAND Downloader_SGH_POP.exe](#))
- D900 Mobile Phone
- Data Cable
- Binary, tfs files

4-3. S/W Downloader Program

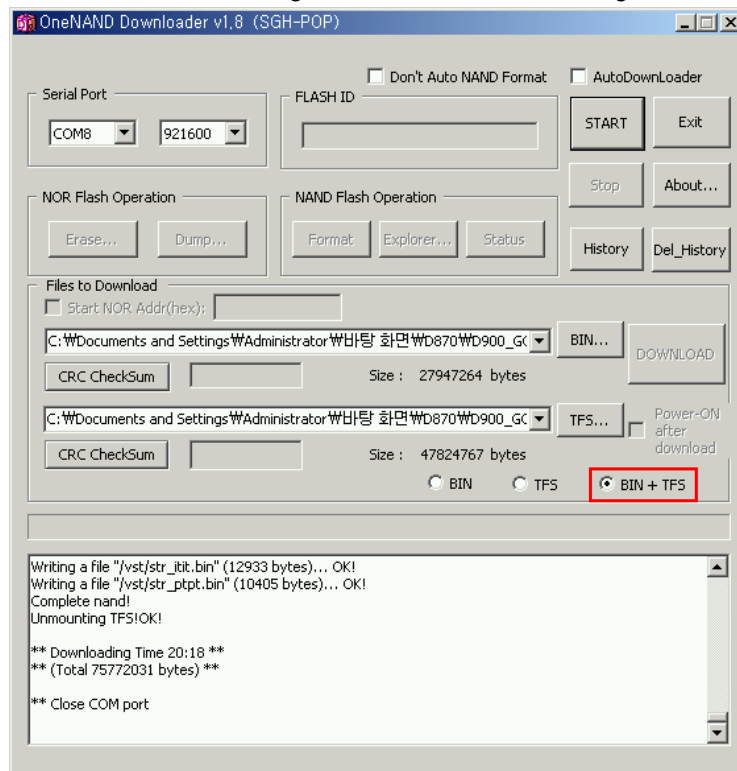

1. Load the binary download program by executing the **"OneNAND Downloader_SGH_POP.exe"**

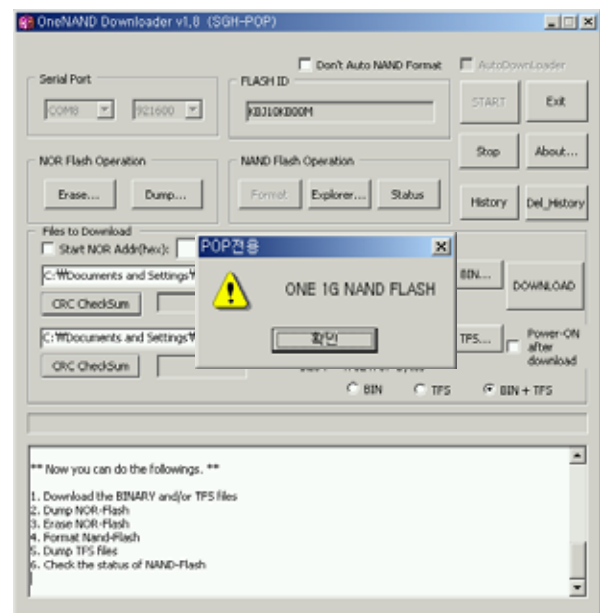

2. Select the check box what you want to download and port No, download late.

3. Select the binary and tfs file what you want to download

4. Now press the button 'Start'. And Power ON.

5. Now press the button 'OK'. Then Press the button 'Download'.

5. Exploded View and Parts List

5-1. Cellular phone Exploded View

5-2. Cellular phone Parts List

11. Disassembly and Assembly Instructions

11-1. Disassembly

— Con Type

<div data-bbox="162 382 219 441">1</div>  <p>This image shows two views of the Samsung Con Type phone. On the left, a close-up shows a screwdriver removing a black screw cap from the bottom left corner, with blue circles highlighting the two caps. On the right, the rear cover is shown with six red circles highlighting the screws to be loosened: two at the top corners, two in the middle, and two at the bottom corners.</p>	<div data-bbox="821 382 878 441">2</div>  <p>This image shows a hand holding the phone while a thin assembly stick is used to pry the rear cover away from the front cover. The stick is inserted into the gap between the two covers.</p>
<p>1. Remove 2 screw caps. 2. Loosen a screw this six point form Rear.</p>	<p>1. Make the space between rear cover and front cover using assembly stick. 2. And then widen space with hand and separate 2 parts.</p>
<div data-bbox="162 1121 219 1180">3</div>  <p>This image shows the internal components of the phone. On the left, the main printed circuit board (PCB) is shown with blue circles highlighting the two keys to be removed and a violet circle highlighting the key connector. On the right, the phone is shown with the rear cover removed, with red circles highlighting the two keys to be removed and blue circles highlighting the two covers to be opened.</p>	<div data-bbox="821 1121 878 1180">4</div>  <p>This image shows the main PCB flipped upside down. A blue rectangle highlights the LCD connector to be opened. A red circle highlights a hook that must be moved carefully during the process.</p>
<p>1. Remove 2 keys. (Red) 2. Open 2 covers. (Blue) 3. Open the Key connector. (Violet)</p>	<p>1. Upside down the main PBA with moving slide. Be careful the hook. (Red) 2. Open the LCD connector. (Blue)</p>

1. Open the slide. (Slide up)
2. Remove the 4 screw caps with pinset.

1. Loosen a screw 4 point form Lower.

1. Make the space between slide upper and slide lower using assembly stick.
2. And then widen space with hand and separate 2 parts.

1. Remove the insulation tape.
2. And separate LCD connector from sub-PBA.

9

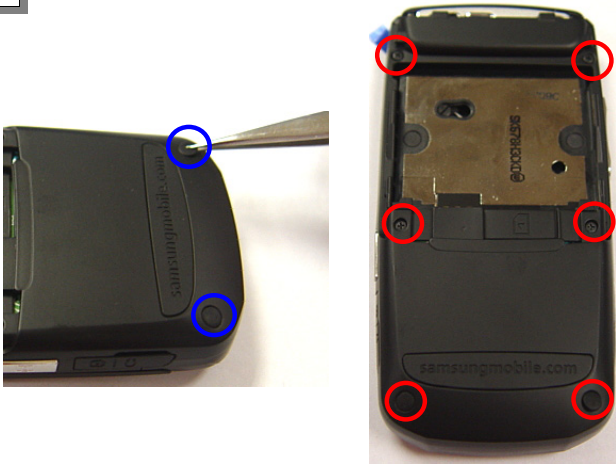

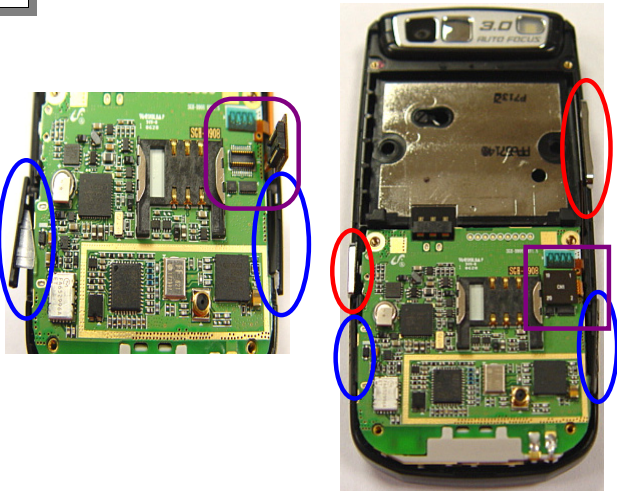

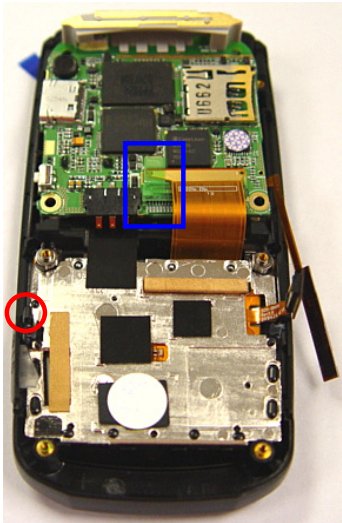

1. Separate Camera connector from sub-PBA and speaker module and camera from slide upper.

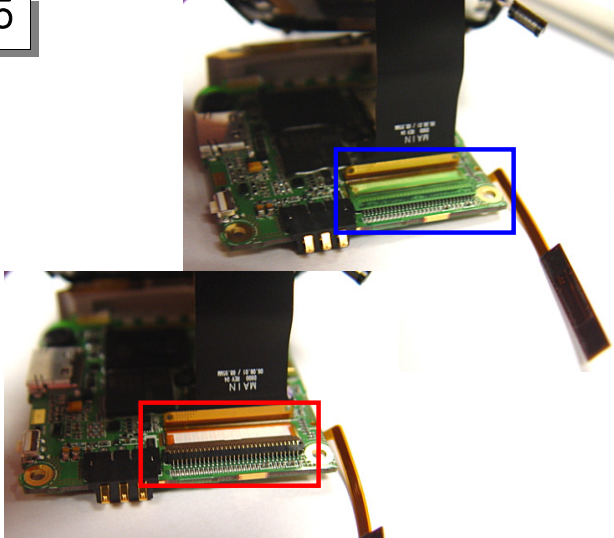

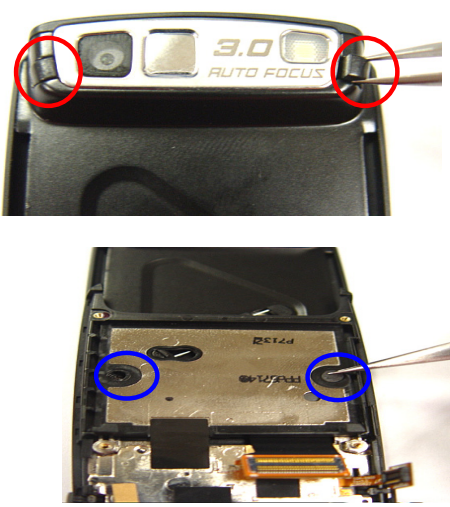

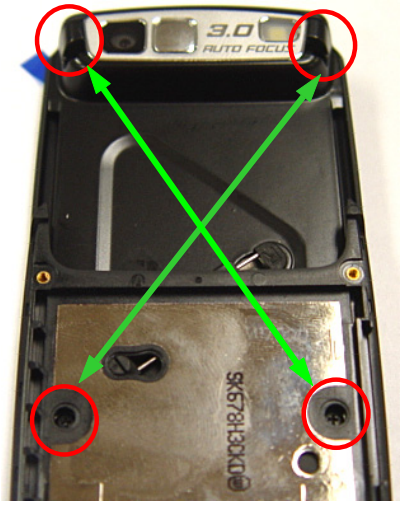

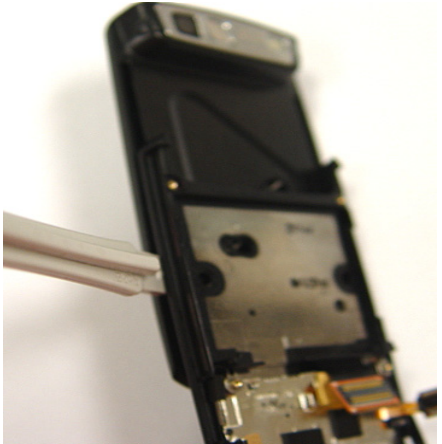

10

1. Separate sub-PBA from slide upper. And then caution the hook.
2. Separate LCD module from slide upper using 4 white points.

— Ho Type

<p>1</p> 	<p>2</p> 
<p>1. Remove 2 screw caps. 2. Loosen a screw this six point form Rear.</p>	<p>1. Make the space between rear cover and front cover using assembly stick. 2. And then widen space with hand and separate 2 parts.</p>
<p>3</p> 	<p>4</p>

<p>5</p> 	<p>6</p> 
<ol style="list-style-type: none"> 1. Remove the insulation tape. (Blue) 2. And separate LCD connector from Main-PBA. (Red) 	<ol style="list-style-type: none"> 1. Open the slide. (Slide up) 2. Remove the 4 screw caps with pinset.
<p>7</p> 	<p>8</p> 
<ol style="list-style-type: none"> 1. Loosen a screw 4 point form Lower. 	<ol style="list-style-type: none"> 1. Make the space between slide upper and slide lower using assembly stick. 2. And then widen space with hand and separate 2 parts.

9

1. Remove the insulation tape.
2. And separate LCD connector from sub-PBA.

10

1. Separate Camera connector from sub-PBA and speaker module and camera from slide upper.

11

1. Separate sub-PBA from slide upper.
And then caution the hook.
2. Separate LCD module from slide upper using 4 white points.

11-2 Assembly

– Con Type

1

1. Prepare the slide upper and LCD module.

2

1. At first attach LCD to main window and put the sub PBA considering sub hook(blue circle).

3

1. At first put the speaker and motor module.
 2. And put the camera at slide upper. (Red)
 3. And combined camera connector to sub-PBA. (Blue)
 4. And put insulation tape on connector.

4

1. At first combined LCD connector to sub-PBA according to picture.
 2. And put insulation tape on connector.

<div data-bbox="168 197 207 247" data-label="Text">5</div> <div data-bbox="269 226 773 756" data-label="Image"> </div> <div data-bbox="160 804 756 921" data-label="List-Group"> <ol style="list-style-type: none"> 1. Put the main-PBA on front cover. 2. Combined LCD connector to main-PBA. </div>

9

1. Put the main-PBA on 4 screw hole. (Blue)
2. Locking the one hook. (Rec)

10

1. Combined Key connector and put side key and camera key.(Violet, Red)
2. Close the cover. (Blue)

11

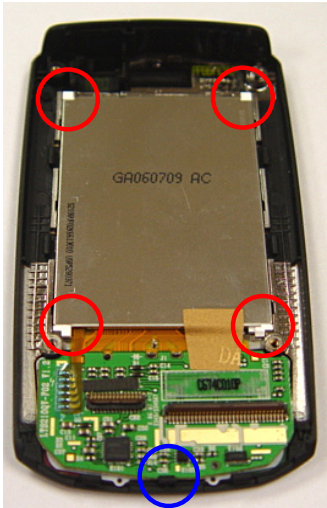

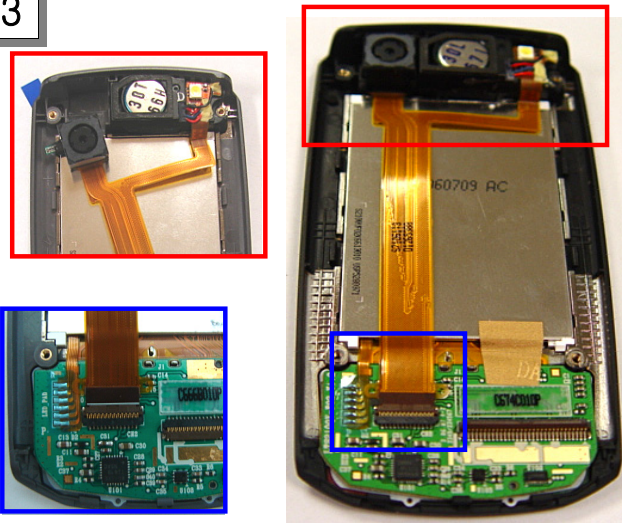

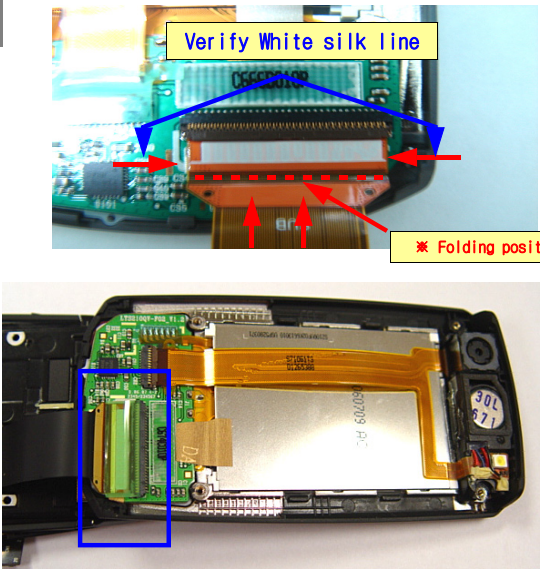

1. Put rear cover on Assay and lock.
2. Be careful losing key.

12

1. Fasten a screw at 6 points with driver.
2. Put the screw cap on below hole with pinset

— Ho Type

<p>1</p>  <p>1. Prepare the slide upper and LCD module.</p>	<p>2</p>  <p>1. At first attach LCD to main window and put the sub PBA considering sub hook(blue circle).</p>
